YOUR BAKERY SOLUTIONS PROVIDER

Product Name:

# Spinning Alfalfa Sprouting Machine

MODEL: FE003003

Features:

- Setting for automatic water supply system and the spin cycle. The automatic control mechanization and water supply system can enhance the good rate and the multiple of production.
- The mechanism creates a perfect growing environment and increase production quality and quantity.
- Automatic spray system will save labor cost.
- Spin mechanism prevents sprouts rotting caused of soaked in still water.
- No need any chemicals to fertilize sprouts. The growing environment is not influenced by other possible pollutions from soil.
- With ventilation opening and fan design provide better temperature control mechanism
- Water sprinkling system ensured water properly
- Optional accessories includes pump, filter, strainer and harvest barrel

### Germinating Environment

Temperature can reach about 22°C - 25°C; Humidity is 85-100%; Filtered water with PH 7.0 (neutral)

### Germinating and Harvest

Period is about 4-5 days; Yield ration 6-12 times; Spin sequence 0.5-2 times an hour (adjustable)

### Maintenance

- Using indoor and prevent from other electronic wave sensitive product
- Work with standard water quality, well draining and ventilating designed environment, prevent from high temperature
- Cleaning after use to sanitize the germinating environment

### Specifications

Power	220V, 1PH, 1/4HP (optional 1/2 HP Pump)
Capacity	20KG/Barrel
Dimension	L 2272 x W 1603 x H 2390 mm
Net Weight	250 KG
